- You will be working in joined rounds.
- You can adjust the width by adding additional chains to the beginning ch 120, but make sure you have an even number of chains.
- You can adjust the length by adding additional rounds after round 32, but make sure you have an even number of rounds (the last round will be the round with hdc's).
- If you find any steps challenging, I suggest checking out my YouTube tutorial for visual guidance.
